Outdoor Distribution Box for Air Conditioning

Provide distribution boxes for outdoor units of air conditioning systems to ensure efficient operation of air conditioning equipment and reliable power supply

Functional Features

- High strength shell
- Low noise design
- Scalable functionality

Applicable Scenarios

- · Commercial buildings
- · Industrial premises
- · Multi-storey buildings

Technical specifications

Parameter	Value
Voltage class	380V
Maximum power	20kW
Material	stainless steel
Power range	10kW-20kW

Our Outdoor Distribution Box for Air Conditioning are designed to provide stable power supply for HVAC outdoor units. With durable construction and efficient performance, they ensure optimal operation in various industrial and architectural applications.
