## **Building Fan Distribution Boxes**

Provides distribution boxes for building fans and air conditioning systems to ensure efficient operation of equipment and stability of power supply.

## Functional Features

- High power configuration
- Low noise operation
- Waterproof and dustproof design

## Applicable Scenarios

- · Industrial buildings
- · Construction Wind Turbines
- Wind turbines

## Technical specifications

Parameter	Value
Voltage class	380V
Maximum power	50kW
Material	aluminum alloy
Power range	20kW-50kW

Our building fan distribution boxes are designed to provide stable power supply for ventilator and HVAC systems. With robust construction and efficient performance, they ensure optimal operation in various industrial and architectural applications.
