Distribution Boxes for Fire Control Rooms

Provides distribution boxes for use in fire control rooms to support the stable operation of fire monitoring and alarm systems.

Functional Features

- High safety
- Low noise design
- Expandable functions

Applicable Scenarios

- · Fire Monitoring Center
- · Fire alarm system
- · Fire pumping station

Technical specifications

Parameter	Value
Voltage class	220V/690V
Maximum power	30kW
Material	fireproof aluminum alloy
Wiring	Flexible wiring

Our control room distribution boxes are designed to provide reliable power supply for fire protection and security systems. With durable construction and efficient performance, they ensure optimal operation in various industrial and architectural applications
