## Power Distribution Box

Provides power distribution boxes used in industrial production for a wide range of machinery, equipment and production lines to ensure a stable power supply.

## Functional Features

- High strength housing, dustproof and waterproof
- Low noise operation, reduce equipment vibration
- Three-phase, five-wire design supports industrial power needs

## Applicable Scenarios

- · Machinery Manufacturing
- · Industrial automation
- · Building Facilities

Parameter	Value
Voltage class	380V/630V
Maximum power	100kW
Material	High-strength aluminum alloy or stainless steel
Power range	10kW-100kW
